Use

1. Remove the contents from the shipping bag.
2. Using the included tie-wrap, affix the train regulator to the parachute (or balloon if a parachute is not used).
3. Either cut off the excess tie-wrap or insert it down the center tube of the train regulator.
4. Carefully remove the loose end of the string from the slit at the top of the train regulator.
5. Use the bottom tie-wrap to attach the train regulator to the radiosonde.
6. Ensure the rubber flap is extended downward.
7. Holding the radiosonde in one hand and the balloon with the other, walk to release point.

Storage Conditions

Store in plastic shipping bag
Air Temperature: -50°C to +60°C
Humidity: 5% RH to 100% RH (non-condensing)
Altitude: -50 m to 3 km, MSL
